Professional Summary

Software Engineer and 2026 Computer Science graduate with 1+ year of industry experience building and deploying production software. Promoted from Software Engineer Intern to Software Engineer in Aug 2026. Independently developed an enterprise workflow automation product used by 3,000+ users across pharmaceutical and medicine-manufacturing companies. Experienced with React, TypeScript, Node.js, PostgreSQL, Docker, and Linux, plus AI-powered applications using LLM APIs.

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, SQL

Frontend: React.js, React Native, HTML5, CSS3, Tailwind CSS

Backend & DevOps: Node.js, Express.js, REST APIs, Docker, Linux, Git, CI/CD, Jest, Postman

Databases: PostgreSQL, MongoDB, MySQL, SQLite, Redis

AI/ML: LLM APIs (OpenAI, Gemini), NLP, scikit-learn, SHAP

Experience

Pivot Path (formerly Arcolab Private Limited)

Jan 2026 – Present

Software Engineer (previously Software Engineer Intern)

Bengaluru, India

- Independently built a workflow automation product for pharmaceutical and medicine-manufacturing companies from the ground up; now in production with **3,000+ users across multiple companies via SSO**, supported by a team of 8 engineers.
- Promoted from Software Engineer Intern to **Software Engineer in Aug 2026**, taking increased ownership of workflow automation and production delivery.
- Designed and shipped **8+ production modules and extensions** covering workflow execution, dashboards, SOP/GxP validation, localization, data migration, barcode management, form automation, and approval workflows.
- Built core workflow engine logic in **Node.js and TypeScript**, including states, transitions, parallel workflows, task assignment, approvals, authorization, preconditions, delegation, and audit tracking.
- Designed **PostgreSQL database schemas and data models** to support configurable, multi-step enterprise workflows.
- Built **React/TypeScript** workflow dashboards and managed **production deployments using Docker on Linux**, with Git-based CI/CD.

Arcolab Private Limited

Nov 2024 – Mar 2025

Full-Stack Developer Intern

Bengaluru, India

- Built a **full-stack internal cybersecurity application** (React.js, Node.js, MongoDB, MySQL) adopted by approximately **200+ users** to centralize security operations.
- Developed an **ITSM ticketing system for XDR incident management** and modules for Security Patch Management, USB Access Control, and IOC Blocking, building both **frontend components and backend REST APIs**.
- Reduced manual effort in cybersecurity operations by digitizing previously manual processes, working directly with cybersecurity stakeholders on requirements and design.

Projects

OneBox – AI-Powered Email Aggregator | Python, Node.js, Express.js, SQLite (FTS), OpenAI API

GitHub

- Built an **email aggregation platform** integrating Gmail and Outlook via IMAP with automated synchronization and error recovery, an **AI-powered classification pipeline using the OpenAI API, full-text search (SQLite FTS)**, and Slack/webhook notifications.

AI-Enhanced College Placement Portal | React, Node.js, Express.js, MongoDB, Tailwind CSS

GitHub — Live

- Built a **full-stack placement management platform** with role-based dashboards and backend REST APIs for students, faculty, recruiters, and administrators, including an **AI-powered resume analysis and career-recommendation feature** using Python NLP models.

Smart Health Queue Management System | React Native, Node.js, PostgreSQL, Redis, Socket.IO

GitHub

- Built an **open-source hospital queue management system** for patient flow and priority-based scheduling, using **Socket.IO and Redis** for queue tracking, appointment management, notifications, and activity-monitoring dashboards.

AI-Powered Mock Interview Platform | React.js, JavaScript, Tailwind CSS, PostgreSQL, Gemini API

GitHub

- Built a mock interview platform using the **Gemini API** for question generation and evaluation customized by role and experience level, with automated feedback reports on interview performance.

Research & Awards

Predicting Customer Churn in Telecommunications: A Leakage-Free Ensemble Pipeline with SMOTE and SHAP –

Developed a leakage-free ML pipeline (**Random Forest, SMOTE, RandomizedSearchCV, SHAP**), improving recall from **0.495 to 0.693**; received the **Best Paper Award** at IC-SIIT SYNERGY 2026. (Certificate)

Education

JSS Academy of Technical Education

Oct 2022 – May 2026

Bachelor of Engineering in Computer Science and Engineering (CGPA: 8.1/10)

Bengaluru, India
